Good News and Warning Signs

- Virginia and the United States are in the midst of a new economic expansion.
- Inflation will slowly moderate over the next 12 months. The Federal Reserve will not reduce the discount rate in the short-term unless there is a significant slowdown in job growth and corporate profits.
- For Virginia, unemployment will likely remain below 3% statewide, job growth will continue, and, barring an expected shock, economic growth should average 2% (or more) for 2024 (and possibly 2025).
- Political uncertainty, domestically and globally, remains the greatest threat to continued growth in 2025. Increasing tariffs or sharp reductions to immigration would significantly undermine growth and spark higher inflation in 2025.

2024 Outlook for Hampton Roads

- Defense Spending will continue to provide a boost for the Hampton Roads Economy.
- Regional Economy is expected to grow at the same pace as the national economy.
- Port of Virginia should see a moderate growth in tonnage and loaded TEUs.
- With anticipated lower annual mortgage rates in 2024, existing home sales are likely to stabilize but median prices are expected to continue to increase.
- Going forward, uncertainty in Washington will continue to be a major concern for the health of the regional economy.
